

BLACK SUMMIT HOLDINGS LLC

Service-Disabled Veteran-Owned Small Business (SDVOSB)

Operational Risk | Security | Assessment | Decision Support

UEI: CNFZAE5JSWE6

CAGE: 15JA2

SAM: Active

Black Summit Holdings LLC provides evidence-disciplined security, risk, vulnerability, policy, and operational assessment support for government agencies, prime contractors, and commercial organizations. We turn findings into documented priorities, corrective actions, and decision-ready outputs while keeping scope, assumptions, and limitations clear.

CORE COMPETENCIES

- Physical-security and vulnerability assessments
- Operational-risk analysis and corrective-action prioritization
- SOP, post-order, policy, and incident-procedure review
- Documentation-gap analysis and accountable follow-up systems
- OSINT, source evaluation, requirements extraction, and research briefs
- Vendor / third-party risk methodology and due-diligence support
- AI-assisted assessment workflows with human review and documented assumptions
- Evidence, chain-of-custody, and decision-support workflow development

REPRESENTATIVE DELIVERABLES

- Assessment findings and risk-priority summaries
- Corrective-action registers and implementation roadmaps
- Revised SOPs, checklists, post orders, and incident workflows
- Research briefs, requirements matrices, and decision documentation
- Audit-oriented reports and evidence-handling structures

DIFFERENTIATORS

- **Assessment-first approach.** Focused on identifying conditions, gaps, and practical actions - not generic consulting language.
- **Evidence-disciplined outputs.** Findings, assumptions, limitations, and corrective actions are structured for review.
- **Operational perspective.** Veteran-led company with security, law-enforcement, assessment, and mission-support experience.
- **Flexible execution.** Fixed-scope reviews, subcontracting support, teaming, pilot/evaluation discussions, and research support.
- **Local-control mindset.** Development work emphasizes customer-controlled, offline-first, and reviewable architectures where appropriate.
